JONAS MESSIAS DE ANDRADE ALVES

Full Stack Developer | React, Angular, Node.js and Java
Caratinga, MG, Brazil (UTC-3), open to remote | +55 33 99853-1528 | jonasmessias30@gmail.com
Portfolio: jonasmessias.dev.br/pt | LinkedIn: linkedin.com/in/jonasmessias | GitHub: github.com/jonasmessias

SUMMARY

Full Stack Developer with experience in digital products in production, mainly with Node.js and React. I build APIs, interfaces and integrations, from implementation to testing and release. I also build personal projects with Java/Spring Boot and Angular and use AI as support, reviewing the result.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, SQL
Front-end: React, Next.js, Angular, RxJS, NgRx
Back-end: Node.js, NestJS, REST APIs, Spring Boot, Spring Security
Databases and cache: PostgreSQL, Redis
ORM and migrations: Spring Data JPA, Hibernate, Prisma, Flyway
Cloud, DevOps and observability: AWS (EC2, RDS, S3, SES), Docker, GitHub Actions (CI/CD), Sentry
Testing and quality: unit and integration tests, Jest, Vitest, JUnit 5, code review
Process and AI: Git, Scrum, Claude Code

PROFESSIONAL EXPERIENCE

Software Engineer Apr 2026 - Present
oSeuMáximo Ecosystem (EdTech) - Remote

- Built the core API and the 3 apps for students, teachers and admins, taking the education platform to production.
- Implemented billing in Brazil with up to 12x installments, PIX and boleto through InfinitePay, plus international recurring subscriptions in USD, EUR and GBP through Stripe.
- Fixed payment reconciliation and access-release failures, including the case where the payment was approved and the student stayed locked out.
- Built assisted sales over WhatsApp with PIX payment (public link with a QR code and receipt review in the admin panel).
- Refactored the most critical checkout use case with AI agents, from 994 to 184 lines, in 6 PRs protected by automated tests, splitting the rules into separately tested functions.
- Moved the student app from a no-code tool to our own API and brought over the live class scheduler data (906 time slots and 457 exported bookings), ending the company dependence on the vendor.

Front-End Developer Jan 2025 - Dec 2025
Agio - Hybrid Caratinga, MG

- Led 2 projects from start to delivery, a Next.js PWA web app and a React Native mobile app with Expo, managing 3 repositories, and contributed to 5 other team projects.
- Took part in code reviews, refinements and planning, on a team using agile methodologies.
- Turned Figma layouts into front-end technical requirements and reusable components.

Programmer Analyst Apr 2022 - Mar 2023
Versatec - On-site Caratinga, MG

- Delivered over 10 institutional websites in WordPress and PHP, from requirements to launch, with third-party integrations that removed manual steps for clients.

PROJECTS

angular-task-manager - github.com/jonasmessias/angular-task-manager | Demo: task-manager-app-angular.vercel.app

- Kanban app in Angular 20 with Signals, standalone components, its own design system and automatic session renewal, consuming a Java REST API.

spring-task-manager-api - github.com/jonasmessias/spring-task-manager-api

- REST API in Java 17 and Spring Boot with JWT and refresh tokens in Redis, Google login, attachments straight to S3, JUnit and Mockito tests and automatic deploy on AWS.

EDUCATION AND LANGUAGES

- **B.Sc. in Computer Science** - Rede de Ensino Doctum - Feb 2022 - Mar 2026 (completed).
- **Certifications:** Meta React Specialization (Meta, 2026) and Claude Code in Action (Anthropic, 2026).
- **Languages:** Portuguese (native); English (intermediate); Spanish (basic).
